# Syria Crisis

Bi-weekly humanitarian situation report

UNICEF/Syria/2013

13-27 JUNE 2013: SYRIA, JORDAN, LEBANON, IRAQ AND TURKEY

SITUATION IN NUMBERS

## Highlights

Over 1.7 million people, including nearly 870,000 children have fled the violence in Syria, taking refuge in neighbouring countries. Children arriving from Syria have fled for their lives, often with nothing more than clothes on their backs. Girls and boys have experienced or witnessed harrowing atrocities and suffer from distress that can significantly impact their wellbeing and development.

- **SYRIA:** UNICEF and partners continue to provide essential psychosocial support services to over 48,704 children, in addition to 400 adolescents and 344 mothers. During the reporting period, psychosocial support was provided to 1,839 children.
- **LEBANON:** A total of 10,585 children and adolescents benefitted from psychosocial support services in this reporting period including non-formal education, recreational services and psychological first aid in Bekka and North through static and mobile outreach interventions supported by UNICEF, bringing the cumulative total to 47,114.
- **JORDAN:** UNICEF and partners have conducted a variety of structured activities in Child/Adolescent Friendly Space revolving around team building, trust, cooperation, self-esteem, self-awareness, family issues and dealing with anger. Since the beginning of the year, a total of 55,235 (52 per cent male) children have been reached with the structured sessions, which aim to improve the psychosocial wellbeing of children in camps and host communities.
- **IRAQ:** Child Friendly Space/Adolescent Friendly Space activities continue reaching 1,484 children and youth with activities such as sports, music and discussion sessions.
- **TURKEY:** Youth and recreation workers are being trained to provide recreational activities for 10,000 children and youth in the camps, coinciding with the summer break in school.

## UNICEF's Response with partners

Hygiene promotion activities for Transit 7 camp in Iraq started on 26 May 2013. Sixty hygiene promoters managed by Islamic Relief Worldwide (IRW) have reached 4,694 families (22,138 persons) by 27 June with diarrhea disease and measles vaccination awareness (almost 63 per cent of the camp).

Joint efforts of UNICEF and UNHCR resulted in the issuance of a decree by the government of Lebanon allowing Syrian refugee children to sit for the Grade 9 and 12 official exams on the condition that the students submit the necessary documentation as soon as it is retrievable from Syria.

The national vaccination campaign in Syria against measles and polio will end by the 30th of June. Reports received to date (although not from all districts) showed that the campaign reached around 1,086,218 children from 6 months to 15 years with an MMR vaccine, and 758,257 children under 5 with a polio vaccine.

### In Syria

**3,128,000**  
# of children affected

**6,800,000**  
# of people affected  
(OCHA April 2013)

### Outside Syria

**869,660**  
# of registered refugee children and children awaiting registration

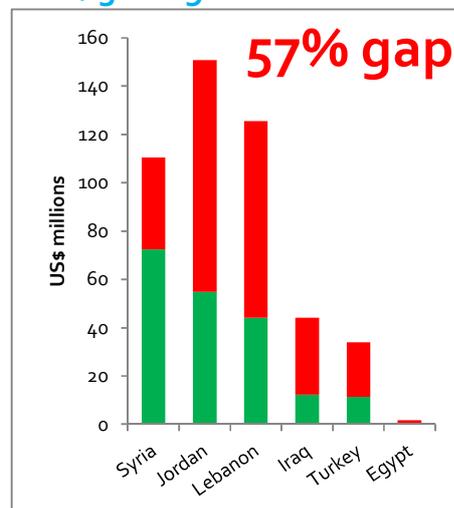

**1,706,584**  
# of registered refugees and persons awaiting registration  
(UNHCR, 27 June 2013)

### Syria Appeal 2013\*

**US\$ 110.46 million**

### Regional Appeal 2013\*

**US\$ 360.19 million**

# Syria

## Highlights

- UNICEF established 60 school clubs in Deir ez Zor governorate enabling 25,536 school-age children to access remedial classes and recreational activities in the affected areas.
- UNICEF continues to distribute hygiene materials to benefit more than 407,250 individuals including children and women in Homs, Dar'a, Sweida, Aleppo, Tartous and al Raqa governorates.
- In total, 70 semi-permanent learning units have been installed to date this year giving safe access to education for 2,450 children.

Estimated Affected Population	
<i>(Estimates calculated based on initial figures from (*) OCHA April 2013. The rest of the figures are calculated based on CBS demographic distribution of 2011 and on UNOHCHR figures)</i>	
Total Affected Population	(*) 6,800,000
Children Affected (Under 18)	3,128,000
Pregnant women (estimate: 5% of the total population)	340,000
Total Displaced Population (a proportion of the above)	(*) 4,250,000
Children Displaced (estimated: 46 % of the population is children)	1,955,000
Children Killed	6,561

## Situation Overview and Humanitarian Needs

In Homs, the general humanitarian situation remains dire. Access to “hard to reach areas” in the governorate has been limited during the reporting period. Whilst there has been a general lull in the crossfire between the main conflict parties, movement across the governorate remains unpredictable. During the second week of June, UNICEF joined an inter-agency mission to assess the humanitarian situation in Al-Qusayr. Most of the population was found having left a city that suffered heavy destruction. The main hospital was found to be destroyed and schools were also damaged. The families that the mission team spoke to mentioned that they had no intention to stay. Some had only gone back to see what could be salvaged from their property.

In Aleppo, the security situation continues to deteriorate with direct impact on the humanitarian response with no dispatch of emergency supplies for over a week. Generators recently dispatched to Aleppo could not be installed in water pumping stations. Missions to Aleppo by UN staff also remained suspended. Humanitarian partners on the ground continue their work supporting IDP and affected population.

The humanitarian situation in Rural Damascus is also of concern. Many communities have poor access to food and medicines with the rise in food and fuel prices over the last two weeks continuing to affect some families’ ability to feed their children.

In Lattakia, approximately 900 IDP families reside at the sports facility under poor humanitarian conditions. During a UNICEF visit to the facility, an urgent need for education and WASH intervention was identified. Recreational activities are planned for IDP children, particularly during the long summer vacation.

In Tartous, a considerable number of displaced persons fled to the governorate recently. The city’s capacity to cope with these IDPs is being overstretched. There are already large numbers of IDP children (girls and boys) seen at traffic lights in Tartous and around coffee shops, begging and hawking items. This practice has been on an increasing trend and is reported to occur up to late hours at night.

Water tanks in a shelter in Homs, UNICEF, 2013

## Programme response

**WASH** UNICEF continues to provide safe drinking water and sanitation services through the rehabilitation of water and sewage networks. During the reporting period, 40,136 IDPs in Homs (Alwaer, Salameya, Hesia and Talbese) were provided with access to safe drinking water.

Additionally, during the reporting period, safe drinking water and hygiene promotion materials were provided to 10,300 IDPs including women and children through the installation of comprehensive water systems in the 48 IDP shelters in Homs and Hama (9,250 IDPs in 35 shelters in Homs in addition to 1,050 in 13 shelters in Salameya in rural Hama). With the support of UNICEF, 2,000 IDPs continued benefiting from water trucking.

During the reporting period, some 41,000 IDPs including women and children in Homs, Dar'a, Rural Damascus, Sweida, Aleppo, Tartous and al Raqa governorates benefited from baby hygiene kits, adult hygiene kits and washing powder and soap. Additionally, 40,000 persons received soap bars in Homs and 5,000 persons received awareness training on house water treatment and the use purification tablets in Homs.

**Child Protection:** UNICEF and partners continue to provide essential psychosocial support services to over 48,704 children, in addition to 400 adolescents and 344 mothers. During the reporting period, psychosocial support (PSS) was provided to 1,839 children, 388 in Tartous, 171 in Damascus, 1,243 in Rural Damascus, 20 in Aleppo and 17 in Lattakia. Additionally, UNICEF in coordination with a local partner distributed 603 recreational kits to shelters in Homs, Tartous and Damascus – enough to benefit 60,300 children.

**Education:** UNICEF continues to support School Club activities in Dar'a, Rural Damascus, Lattakia, Tartous, Hama, Homs, Quneitra, and Damascus in coordination with the Ministry of Education (MoE) and other education partners. A total of 445 school clubs (out of a target of 1,000 for the year 2013) are functioning with 141,362 children (69,651 boys; 69,262 girls) supported to date. Some schools stopped during the examination period as the schools were used as examination centers. With support from UNICEF, the Ministry of Education established a total of 60 school clubs in Deir ez Zor governorate this month. This enabled 25,536 school-age children to access remedial classes and recreational activities in the affected areas.

*PSS activities in Hassia, Homs, UNICEF, 2013*

UNICEF, in coordination with MoE, has established a total of 70 prefabricated classrooms to benefit 2,450 students in Damascus, Homs, Tartous, and Rural Damascus. Over the last two weeks, 30 prefabricated classrooms have been constructed in Rural Damascus, Damascus, Tartous and Homs to benefit 1,050 children.

Educational supplies were dispatched to four governorates with 230 sets of school stationery dispatched to Dar'a, Damascus and Quneitra – enough to benefit a total number of 11,500 children. In addition, 1,200 school supply kits for children and teachers were dispatched to Dar'a, Damascus, Homs and Quneitra benefitting 48,000 children. A total of 75 recreation kits were dispatched to Dar'a benefitting 7,500 children. Further, 1,350 emergency school bags including stationery were dispatched to Daraa benefitting a total of 1,530 children. School supplies and art materials were distributed in cooperation with local and international partners to 9 schools in Damascus, Rural Damascus and Hama benefitting 2,866 children.

UNICEF in cooperation with an INGO provided teachers' training workshop, on new techniques for enhancing educational process in difficult situations for 50 teachers from 8 primary schools in Damascus, Rural Damascus and Dar'a. Also, 60 teachers from 4 new schools received PSS training in Damascus and Rural Damascus.

In cooperation with local and international partners, UNICEF provided 2,258 children including Iraqi children with remedial classes and recreational activities in Damascus, Rural Damascus and Homs. 100 school staff members were trained on PSS skills and vocational training courses also took place in Damascus benefitting 149 adolescents.

UNICEF in cooperation with a local NGO continue to support 1,753 adolescents with life skills, vocational, computer and English training courses in two adolescents' friendly spaces in Al-Waer and Al-Hamra area in Homs. In Rural Damascus, 311 (161 joined the training during the reporting period) adolescents and young people continue to benefit from vocational courses. Additionally, 5,500 adolescent students continue to receive remedial classes in Al-Waer area in Homs with 16,500 adolescents receiving PSS support through cultural activities in cooperation with the Ministry of Culture in 4 governorates (Damascus, Lattakia, Tartous and Sweida).

**Health:** Fifty mobile medical teams in the 12 governorates and the fixed centres in Damascus, Rural Damascus and Quneitra have reached 123,206 children with medical check-ups since the beginning of this year. The target is to reach 570,000 IDP children by the end of this year.

The national vaccination campaign against measles and polio will end by the 30th of June. Reports received to date (although not from all districts) showed that the campaign reached around 1,086,218 children from 6 months to 15 years with an MMR vaccine, and 758,257 children under 5 with a polio vaccine. Dar'a governorate was not able to implement; Idlib governorate implemented in the city only; and Raqqa governorate participated in the last phase of the campaign in the Primary Health Centers.

Ten Interagency Emergency Health Kits (IEHK) were sent to Tartous to cover the needs of 10,000 people for one month, along with one diarrhea set which is sufficient for 600 diarrhea cases. 100,000 leaflets on the prevention of Leishmaniasis were distributed in Homs, in

addition to 500 cooking stoves for IDPs in Homs. Additionally, 500 boxes of high energy biscuits (HEB) were delivered to Al-Kisweh in Rural Damascus through the Circassian Charity Society which is sufficient for 2,500 beneficiaries.

## Inter-Agency Collaboration and Partnerships

UNICEF, in cooperation with other UN agencies and the Syrian Arab Red Crescent (SARC), participated in two unaccompanied inter-agency convoys on the 6<sup>th</sup> of June and the 19<sup>th</sup> of June to Dar'a as follows:

- The first convoy delivered medical supplies benefiting 180,400 people in addition to essential non-food items and hygiene kits benefiting 20,000 people in Dar'a.
- The second convoy delivered additional baby hygiene kits (benefiting the caseload of 20,000 people targeted above), in addition to food rations to 5,000 people in Sanamein in Dar'a. The 2nd convoy benefited as well 30,683 Palestinian refugees, hosted in 2 camps, with medical supplies covering needs for the next 3 months, in addition 3,000 Palestinian refugees were also reached with food assistance covering the needs for the next 6 months.

UNICEF in collaboration with other UN agencies and the SARC branch in Homs governorate delivered convoys of supplies to at least 35,108 beneficiaries in the hard to reach Ar-Rastan. UNICEF participated in an inter-agency assessment mission to Al-Qusayr to assess the humanitarian situation on the ground following recent displacements from the area.

A WASH partners workshop took place on the 24<sup>th</sup> and 25<sup>th</sup> of June in Damascus with some 150 participants from Government, UN and NGOs agencies. The workshop reviewed current WASH sector achievements in Syria including on-going responses and priorities, identified sector gaps and coordination needs, as well as began planning for the development of a strategic operational framework.

## Supply and Logistics

UNICEF successfully dispatched the following items:

**In Aleppo**, 325 recreational kits benefiting 32,500 children, 45,000 kg of washing powder benefiting 90,000 persons, 5,500 baby hygiene kits benefitting 5,500, 40,000 soap bar for 120,000 persons and 500 cooking stoves.

**In Damascus**, 475 boxes of school supplies benefiting 65,500 children.

**In Dar'a**, 3,500 baby hygiene kits benefiting 3,500 infants, 1,000 adult hygiene kits benefiting 2,000 persons, 27,265 kg washing powder benefiting 54,530 persons. 635 school stationary supplies for 96,000 children, 1,530 school bags for 1,530 children, 400 school supplies for 16,000 children and 75 recreation kits for 7,500 children.

**In Homs**, 10 IEHK unit benefiting 1,000 persons, 1,000 HEB benefiting 20,000 children. 2,000 adult hygiene kits for 4,000 persons, 5,500 baby hygiene kits for 5,500 infants, 48,000 kg of washing powder benefiting 24,000 persons, 20 tents, 500 cooking stove and 500 recreation kits for 50,000 persons.

**In Lattakia**, 5,000 kg washing powder for 10,000 persons and 1,250 baby hygiene kits for 1,250 infants.

**In Raqa**, 25,000 kg of washing powder 50,000 persons, 200 HEB box for 4,000, 1,500 adult hygiene kits benefiting 3,000 persons and 2,000 baby hygiene kits for 2,000 infants.

**In Sweida**, 5,000 washing powder bags for 10,000 persons and 1,000 baby hygiene kits for 1,000 infants

**In Tartous**, 10 IEHK basic benefiting 1,000 persons, diarrheal disease set for 1,000 cases, 500 adult hygiene kits for 1,000 persons and 500 recreational kits for 10,000 children and 10,000 kg of washing powder for 20,000 persons.

## HUMANITARIAN PERFORMANCE MONITORING

WASH Estimated #/% coverage	UNICEF & operational partners		
	UNICEF 2013 Target	Cumulative results (UNICEF & Partners)	% of Target Achieved
# of emergency affected population provided with access to drinking and domestic water <sup>1</sup>	10,000,000*	10,000,000*	100%*
#of emergency affected population provided with access to soap and other hygiene items <sup>2</sup>	500,000	324,900	65%
# of emergency affected population with access to appropriately designed toilets and sanitation services <sup>3</sup>	1,500,000	134,166	9%
# of people having access to hygiene promotion messages <sup>4</sup>	950,000	500,000	53%
# of children access safe water, sanitation and hygiene facilities in their learning environment and in child friendly spaces <sup>5</sup>	50,000	5,386	11%
<b>Child Protection</b>

# of children <5 with MAM in supplementary feeding	55,000	15,000	27%

**Comments and Background:**
**WASH:**

<sup>1</sup>This indicator captures daily average of people accessing water through water tankering, rehabilitation and maintenance of water systems. Chlorination is reported as a different activity, with a target to reach 10 million people covered for an initial period of three months starting February 2013.

<sup>2</sup> Capturing distributions of various hygiene items including family and baby hygiene kits, soap and other item distributions. The cumulative result for end June is lower than the result reported in May due to calculation error

<sup>3</sup> Capturing construction/establishment of latrines in various affected areas and centres, using an agreed person to latrine ratio of 1:50 (50 beneficiaries for one toilet on average).

<sup>4</sup> Target reflects a combination of interventions including 500,000 people to receive both hygiene supplies (hygiene kits, soap and other hygiene materials) and hygiene promotion messaging, as well as 250,000 people to be reached through messaging and tools only (mass media component)

<sup>5</sup> Target reflects interventions in schools and child friendly spaces by WASH and Education partners implementing UNICEF's WASH in schools component.

\*Figures for medium term water supplies are currently being reviewed.

\*\* Intervention over three months only.

**Child Protection:**

<sup>1</sup>Beneficiaries of psychosocial support include children reached through the following components: community based child-friendly spaces (static) and mobile child friendly spaces.

<sup>2</sup>As per Child Protection in emergencies benchmarks/standards, objective is to register all identified cases.

<sup>3</sup> Captures children reached with mine-risk education awareness sessions delivered through multiple components, including activities in Child-Friendly Spaces, schools/school clubs and general awareness sessions implemented by partners.

**Education:**

<sup>1</sup>Indicator capturing 260,000 children in remedial classes through school clubs and 325,000 beneficiaries (children) of school rehabilitation and/or prefabricated classrooms.

<sup>2</sup>Psychosocial support provided as part of school club activities by teachers trained on basic PSS and or school counsellors. The target also includes 10,000 children under six to be reached at kindergarten level.

<sup>3</sup> The target includes non-formal and informal education (combining extra-curricular activities, and life-skills training/education at CFS and Adolescent Friendly Spaces).

<sup>4</sup> 1,000,000 children targeted through distribution of school material packages. A portion of these children will also be receiving individual school bags and stationary supplies as part of a combined distribution effort.

**Health:**

\*2013 reports received from 4 out of the 14 governorates.

<sup>1</sup> Immunization target comprised of 700,000 U5 children for catch up of 2012 campaign, 300,000 from 6 months to 15 years in IDP centres, and 1,500,000 school children from grade 1 to 4. To be implemented in part through campaigns and routine. Results will be based on administrative data (WHO/MoH) at governorate level, with reporting to be potentially delayed due to communication difficulties.

<sup>2</sup> Indicator captures number of children under one year reached over January-June with all EPI antigens through mobile EPI/mobile clinics providing vaccination services as well as children to be reached through routine EPI services.

<sup>3</sup> Target revised to 268,000 IDP children reached through mobile clinics, in addition to 200,000 pregnant women reached with health education and the supply and distribution of a combination of health and medical supplies, including First Aid Kits, Emergency Health Kits, Delivery Kits, etc.

<sup>4</sup> Indicator captures children aged 6-59 months also receiving Vitamin A supplementation as part of the measles catch-up component (see above). Target reduced from the previous target as effort will focus on catch-up component.

**Nutrition:**

Only dispatch reports available for 2013. See narrative.

# Lebanon

## Highlights

- In the past four weeks, 26,396 children have received psychosocial support in education and 17,252 have benefitted from non-formal and informal education activities.
- 6,440 children and adolescents benefitted from psychosocial services in June
- Since May, 13,623 people have received direct healthcare from mobile medical units in informal tented settlements

## Situation Overview and Humanitarian Needs

A total of 481,725 refugees are currently registered with UNHCR, of which more than fifty percent are children. An additional 82,314 Syrians have been in contact with UNHCR to be registered, bringing the total to 521,040. The number of Palestinian refugees from Syria (PRS) in Lebanon now exceeds 61,000 individuals.

Total number of registered and unregistered refugees: 564,039 (UNHCR June 27, 2013)			
Registered Refugees	Total	Male	Female
Total Affected Population	481,725	245,198	236,527
Children Affected (Under 18)	253,869	130,066	123,803
Children 0-4 Years	95,382	48,654	46,727

## Programme response

**WASH** As part of UNICEF's health activated response in tented settlements, WASH interventions are underway in Cheik Ayash where there has been one identified case of malnutrition and cases of scabies and lice in Tal el Abaid. Interventions in Cheik Ayash include the installation of emergency latrines, rehabilitation of a contaminated bore hole and grey water management, addressing the needs for 314 beneficiaries. In Tal el Abaid, UNICEF has supported ACF with a comprehensive WASH response for 200 households (approximately 1,000 beneficiaries), with the installation of 40 latrines, 94 storage tanks (1,000 litre), activation of a community water committee and hygiene promotion activities.

**Child Protection** UNICEF, through its partners, continues to reach the most vulnerable children in Lebanon affected by the Syria crisis with life-saving centres, community outreach, psychosocial support services (PSS) and gender-based violence (GBV) prevention and response programmes.

A total of 10,585 children and adolescents benefitted from PSS services in this reporting period including non-formal education, recreational services and psychological first aid in Bekka and North through centre based and mobile outreach interventions supported by UNICEF, bringing the cumulative total to 47,114.

In the past fortnight, 191 women and girl survivors of Gender Based Violence (GBV), and at risk of GBV have received psychosocial support, counselling, life skills based education, parenting classes, Infant and Young Child Feeding sessions and awareness raising services at the four Women and Girls Community Centres run by the International Rescue Committee. Further, in the past two weeks, 1,598 women, girls, and boys were sensitized on GBV (especially on the issue of early marriage) through awareness sessions and games, on the occasion of the World Refugee day. Women, girls and boys received information on available services through leaflets and directory of services produced by UNICEF and its partner KAFA, bringing the cumulative total for GBV support to 3,454. 150 women and adolescent girls received dignity kits.

UNICEF continues to support PSS programmes through social development centres, community and centre based outreach psychosocial activities in mainly the North and Bekkaa regions including Awada Bani Sakher, Machutta hamoud, Ragam Hussein; Ragam Khalef and a social development centre in the municipality of Amayer and Wavel Palestinian refugee camp. .

**Education** In the past four weeks, UNICEF and partners have provided 17,252 children and adolescents with non-formal and informal education services; and 26,396 with psychosocial support as part of education programmes, bringing the cumulative totals for 2013 to 24,833 and 34,862 respectively.

Joint efforts of UNICEF and UNHCR resulted in the issuance of a decree by the government of Lebanon allowing Syrian refugee children to sit for the Grade 9 and 12 official exams on the condition that the students submit the necessary documentation as soon as it is retrievable from Syria.

Official exams in South of Lebanon (Saida and Nabatieh) have been interrupted by escalation of the security situation.

96 public schools with high numbers of Syrian refugees (over 20,000 children) have been assessed and minor rehabilitation and WASH improvement interventions are starting now that the summer vacation is near, and will be completed before the start of the academic year in September 2013.

**Health** Fifteen UNICEF-supported mobile medical teams have provided free, direct healthcare interventions to patients in 62 tented settlements and collective shelters in Baalbek, Akkar, Zahle and Hermel. Since the start of May, of the 56,680 people living in the reached settlements, 13,623 have sought medical assistance through the mobile clinics. The clinics have examined 1,417 pregnant women, vaccinated 3,427 people against measles and 2,465 against polio. The prevalence of skin diseases in tented settlements is apparent with 4,058 patients infected with lice and 2,836 with scabies. Plans are underway for the mobile clinics to cover all tented settlements until the end of 2013, with a focus given firstly to UNICEF established priority mapping list. UNICEF has replenished supplies of medication for implementing partners Ministry of Public Health and Beyond Association.

In the second phase of UNICEF's vaccination campaign over 270,000 children under the age of 18 have been vaccinated against measles, of which nearly 41,000 are Syrian. More than 83,000 children under 5 have received polio vaccinations and 258,000 children under 18 received vitamin A supplementation. This is additional to the 294,000 children immunized against measles, 72,000 against polio and 123,000 provided with vitamin A supplementation across ten provinces in February.

Additionally, UNICEF continues to support vaccinations of newly arriving refugees through vaccination clinics at UNHCR registration centres. To date, these centres have provided vaccinations to nearly 25,538 newly arriving refugee children (11,669 in Zahle, 9,002 in Tripoli and 4,867 in Tyre).

Taking into account the first and second campaign, those vaccinated at UNHCR registration centres, children vaccinated through UNRWA and those reached by mobile medical teams in tented settlements, the total of Lebanese, Syrian and Palestinian children reached include 617,527 children under the age of 18 vaccinated against measles, 381,953 children under the age of 18 receiving vitamin A supplementation and 179,694 children under five vaccinated against polio.

## Inter-Agency Collaboration and Partnerships

- UNICEF partner Save the Children (SCI) rolled out the first PSS working group as part of the follow up plan from the joint UNICEF - SCI training on PSS and child friendly spaces conducted in May 2013.
- UNICEF and UNHCR supported the establishment of a case management task force under the child protection working group to agree and finalise interagency tools for case management of child protection cases

**Communications for Development (C4D)** Two cartoon posters on scabies and lice for adults and children have been developed and printed. The material are be widely distributed by the Ministry of Public Health, the Ministry of Social Affairs, the Ministry of Education and all national and international NGOs.

## Supply and Logistics

In the last 2 weeks, the following has been distributed to government agencies and implementing partners:

- 1,150 bed sets in the Bekka
- 4,760 dignity kits to four child protection partners
- Bottles of permethrine shampoo to schools for the treatment of lice for 65,000 children.
- UNICEF supported the Ministry of Health with the release of 8 freezers and medical supplies worth \$26,000.

# Jordan

## Highlights

- A total of 507,448 children aged six months to 15 years (including 62,000 Syrians) have been vaccinated against measles during the first two weeks of the vaccination campaign launched in Irbid and Mafrq governates on 8 June.
- Students at School II in Za'atari camp have resumed school following the start of the second semester, which will run from 23 June to 12 September 2013.
- UNICEF partner OXFAM has completed the hand-over of 288 latrines and 240 showers to WASH committees, to serve up to 14,400 refugees in Za'atari camp.

**Total number of registered refugees and pending registration: 491,780 (UNHCR June 27, 2013)**

Registered Refugees	Total	Male	Female
Total Affected Population	415,361	197,296	218,065
Children Affected (Under 18)	223,880	112,978	110,901
Children Under Five	76,842	38,213	38,629
Children 6 to 23 months	29,075	14,538	14,538
Pregnant women	18,691	N/A	18,691

## Situation overview and humanitarian needs

Over 243,963 Syrian refugees have crossed into Jordan since 1 January 2013, bringing the total number of Syrians now registered or awaiting registration with UNHCR to 487,543. The Government of Jordan estimates there are now over 540,947 Syrians in the country, of which over half are children under 18. A total of 11,749 refugees have been transported to Za'atari and Emirates Jordanian Camp (EJC) refugee camps by IOM so far in June. Since the beginning of June, an estimated 500 people have been brought to the camps by IOM every day (compared to 800 a day in May).

## Programme response

**WASH** UNICEF partners the German Federal Agency for Technical Relief (THW) and World Vision are progressing with the construction of WASH facilities in the new Azraq camp, being designed for 10,000 people, with the first set of septic tanks now installed. A total of 4,744 tanks will be installed, which will serve up to 56,928 beneficiaries. The first zone/'village' of the camp will be ready by mid-July.

UNICEF partner OXFAM has contracted the installation of water storage tanks area in Za'atari (module 7). The contractor has mobilized and started gravelling and grading of the land, in order to install 13 tanks (each of which has a capacity of 95 m<sup>3</sup>) which will increase water storage capacity at the two boreholes constructed in the camp. These tanks will help provide a more accessible and reliable water supply, especially ahead of the increased needs expected in the upcoming summer months.

UNICEF/OXFAM have finished decommissioning the temporary WASH blocks in module 4 of the camp and completed the hand-over of 48 new blocks (288 latrines and 240 showers) to WASH committees, which will serve up to 14,400 refugees in the area. The WASH committees are working to keep the blocks clean and properly maintained.

UNICEF attended a workshop with Yarmouk Water Company (YWC) to discuss the challenges faced by water authorities in the North Governorates regarding water, sanitation, and hygiene issues. UNICEF/YWC are trying to identify solutions that can be of help in facing these challenges especially in the coming summer and the shortage of water supply in Jordan and the noticeable increase in the number of Syrian refugees in the host communities.

**Child Protection** UNICEF and partners have conducted a variety of structured activities in Child/Adolescent Friendly Spaces camps revolving around team building, trust, cooperation, self-esteem, self-awareness, family issues and dealing with anger. Since the beginning of the year, a total of 55,235 (52 per cent male) children have been reached with the structured sessions, which aim to improve the psychosocial well-being of children in camps and host communities. Of these, an estimated 10 to 15 per cent also received case management services.

UNICEF/Save the Children International currently oversee a total of 12 community based child protection committees in Za'atari. Each committee is composed of ten to 15 Syrians (men and women). Through these committees, some 9,770 refugees (51 per cent female) have been reached with awareness raising messages on child protection, GBV and positive discipline.

UNICEF/Mercy Corps have finished installing durable shading in four playgrounds in Za'atari and King Abdullah Park (KAP) camps which have been reopened. Two new playgrounds (in modules 6 and 7) have been added. Special activities were organised for children in larger covered play areas on World Refugee day. During the reporting period, a total of 15,000 children attended different playgrounds in Za'atari and KAP. To date, a total of 9 playgrounds have been opened with UNICEF support in both these camps.

Since the beginning of the year, UNICEF/International Rescue Committee (IRC) have registered 274 unaccompanied children in Za'atari, out of which 180, or 67 per cent, have been reunified with parents/caregivers or relatives. A total of 60 children have been placed in foster care while the remaining 34 children are currently unaccounted for. In the reporting period, six new foster families were identified and screened. In the same period, community outreach teams identified and registered 64 separated and seven unaccompanied children.

**Education** Students at the School II in Za'atari camp have resumed school after a 10-day mid-term vacation. This second semester will run from 23 June to 12 September 2013. At School I, final exams started on 24 June and will continue until 12 July, followed by the summer holiday which will last until the end of September.

A total of 508 students in Za'atari are now enrolled in catch up classes in the Remedial Education Centre run by UNICEF partner Relief International (RI), of which over half are girls. 244 students are registered for catch up classes held in the School II. In addition, 140 students are enrolled in the catch-up classes in King Abdullah Park (KAP) and Cyber City (CC). This brings the total number of students enrolled in catch-up classes in Za'atari, KAP and CC to 892. In addition, NRC supported by UNICEF has started an informal education programme in Za'atari in a new youth centre located below Module 3. To date, 719 Syrian students (54 per cent girls) have registered, out of a target of 840 students.

On 16 June, UNICEF hosted a meeting with all education actors in Za'atari camp to discuss operational issues, comprehensive mapping schedules, gaps and outreach strategies in terms of coverage (currently covering children and youth aged 6-24). The mapping of education services has begun and is expected to assist in identifying gaps and responding to the needs more effectively, in addition to ensuring better referrals.

In host communities, the number of Syrian and Jordanian students registered in summer activities run in 10 centres by UNICEF/Madrasati Initiative has reached 1,128. These activities are run in 10 centres and offer children a variety of activities, including art, sports, computer skills, life-skills and awareness sessions, puppet shows, and recycling projects.

**Health** The Ministry of Health (MoH) and UNICEF/UNHCR/WHO are continuing the mass measles vaccination and Vitamin A supplementation campaign. The campaign was launched in Irbid and Mafraq on 8 June and targets Syrian, Jordanian and other children aged six months to 15 years for measles vaccination and children six to 59 months for Vitamin A supplementation. A total of 507,448 children (including some 62,000 Syrians) have been vaccinated against measles during the first two weeks of campaign, while, 207,084 children (6-59 months) have received Vitamin A –out of a target of nearly 600,000 for measles and over 205,000 for Vitamin A.

With UNICEF technical support, IOM has been immunizing of newly arrived Syrian refugees against measles and polio in Za'atari and EJC camps continues. Measles vaccination is provided to refugees aged six months to 30 years, polio to children 0 to 59 months, and Vitamin A supplementation to children aged six to 59 months. Since the start of the programme on 16 April, 35,695 children (six months to 15 years of age) have been vaccinated against measles and 10,610 children (0-5 years) against polio. In addition, 9,855 children (6-59 months) were provided with vitamin A supplementation. This brings the total number of children (six months to 15 years) vaccinated against measles in both Za'atari and EJC camps since the start of the year to 106,800.

During the last week, 478 children under five visited the five Oral Rehydration Therapy (ORT) corners established in Za'atari (two in the Medecins du Monde clinics, two in Infant and Young Child Feeding (IYCF) caravans and one in the MSF hospital). The majority of these were for cases of watery diarrhea with no dehydration and 40 required referrals to health facilities and Diarrheal Treatment Units for further assessment.

**Nutrition** During the last two weeks, 1,423 mothers and 798 children under five visited the two UNICEF/Save the Children Jordan (SCJ) IYCF caravans in Za'atari camp. In addition, 2,786 children under five and lactating mothers received nutritional snacks. Through

this project, UNICEF/SCJ provide nutritional support and guidance, including breastfeeding promotion, complementary child feeding, one-to-one counseling, and health education sessions for pregnant/lactating women in the camp. A third IYCF caravan will be setup in the camp by mid-July.

## Inter-Agency Collaboration and Partnerships

Two members of the Child Protection sub-working group participated in a three day training 'Gender for Humanitarian Action' facilitated by the IASC GenCap Senior Gender Advisor. The two members will be the Sector Gender Focal Points and will be expected to assist the sector to identify the distinct needs of women, girls, boys and men, tailor sector strategies to meet these needs and to measure the difference it makes for women, girls, boys and men.

UNHCR, UNICEF and all partners coordinated a variety of activities to mark World Refugee Day on 20 June. UNICEF Jordan Representative Dominique Hyde published an Op-Ed piece in the Jordan Times ahead of Refugee Day on the situation of Syrian and vulnerable Jordanian children in the country, especially those in host communities. The article is available here: <http://jordantimes.com/helping-ensure-syrian-children-do-not-become-a-lost-generation>.

## Communications for Development (C4D)

UNICEF is preparing C4D strategies for the Back-to-School campaign in Za'atari camp and host communities, to distribute messages on the importance of education to the Syrian refugee children and parents. UNICEF is also planning to mobilie youth groups to paint key child protection, education, hygiene and health messages on WASH blocks in Za'atari.

#### Comments/Background

**WASH:** \*These figure reflects the number of people currently accommodated in Za'atari camp, King Abdullah Park (KAP) and Cyber City (CC), plus the population reached in host communities. \*\*These figure reflects the number of people currently accommodated in Za'atari camp, King Abdullah Park (KAP) and Cyber City (CC), as UNICEF is the sole WASH provider. Camp population figures are UNHCR estimates, based on active UNHCR registrations. Actual population is subject to uncertainties including incomplete camp departure information and other variables.

Note: UNICEF targets in the table above account for both current and anticipated needs, using targets accounting for projected future influx of refugees.

**Child Protection:** \*This indicator replaces that of the number of children placed in alternative care. Alternative care arrangements in Jordan need to be approved by court. It is expected that children will only be put in formal care arrangements once the system currently being established is fully functional.

**Education:** \*Target includes children enrolled in formal public schools only (in both Za'atari camp and host communities). Note: UNICEF targets in the table above account for both current and anticipated needs, using targets accounting for projected future influx of refugees. \*\*\*Not including 1,987 Jordanian children with access to psychosocial support in education programmes.\*\*Previously, results were joined with catch-up classes.

**Nutrition:** UNICEF targets in the table above account for both current and anticipated needs, using targets accounting for projected future influx of refugees.

**Health:** \*Covers children under 15 years of age in Za'atari camp and children under 5 in host communities. \*\*Undergoing verification/pending from MoH. Note: UNICEF targets in the table above account for both current and anticipated needs, using targets accounting for projected future influx of refugees.

# Iraq

## Highlights

- Relocation of refugees from Camp 1 and 2 to Al-Obedy is underway.
- The preliminary results of a UNICEF-funded standard rapid nutrition survey among 900 children under the age of five in Domiz camp has been made available by the Ministry of Health. The survey revealed a Global Acute Malnutrition Rate of 7.4 per cent.
- A new health and hygiene promotion (HHP) technical working group was established in Domiz to ensure a coherent approach to HHP.

## Situation Overview and Humanitarian Needs

The situation in Domiz and Al-Anbar remains stable. However, the number of refugees entering northern Iraq from Syria has decreased dramatically as a result of the closure of the Sehela border crossing between Syria and Iraq (Dohuk Governorate). Between 1-20 June, only 3,731 Syrians were recorded as persons of concern with UNHCR; a significant reduction from a peak of 30,998 new arrivals in February 2013.

In contrast to the long-term trend of the vast majority of Syrians settling in Duhok, in this reporting period arrivals were minimal (82), with the majority of Syrians electing to settle in Erbil (3,197) and Sulemaniyeh (1,137). Al-Qaim continues to trend toward depopulation for the fifth consecutive month with 377 refugees electing to return to Syria, leaving a total registered population of 5,570 from a peak of 8,955 in January 2013.

## Programme response

### WASH

#### Western Iraq

All WASH facilities in Al-Obedy were tested in preparation for the relocation of the refugees from Camp 1 & 2 to the new camp. Relocation started on 23 June with an average of 250 refugees per day. In coordination with the Directorate of Water in Al-Qaim, WASH facilities in Jerejeeb and Al-Obedy will be rehabilitated by UNICEF in preparation for the increased demand of water during the summer months when water requirements will exceed current capacity.

The new phase of a hygiene promotion campaign supported by UNICEF started in the host community in Al-Qaim district covering 300 refugee families through the distribution of Family Hygiene Kits to all refugees by UNICEF's implementing partner, Save the Children.

#### Northern Iraq

Construction of the water network for Transit 7 continues as does the work in laying the main pipes and connections to tents; the 21m<sup>3</sup> storage tanks were placed on the 10 bases and work is now focused on connection the tanks to pipes. Household connections to more than 800 tents have been completed bringing coverage to 90 per cent. The main water pipe for Transit 7 was connected to the main water pipe feeding the camp.

Hygiene promotion activities for the whole camp started on 26 May 2013. Sixty hygiene promoters managed by Islamic Relief Worldwide (IRW) have been distributed amongst all areas of the camp to provide regular hygiene and sanitation promotion for over 35,000 people in the camp. To date, 4,694 families (22,138 persons) have been received Diarrhoea disease and measles vaccination awareness covering almost 63 per cent of the camp.

**Total number of registered refugees and pending registration: 159,140 (UNHCR June 27, 2013)**

Registered Refugees	Total	Male	Female
Total Affected Population	159,140	101,054	58,086
Children Affected (Under 18)	61,587	33,738	27,850
Children 0-4 Years	23,234	11,776	11,458

## Child Protection

### Western Iraq

Preparations are ongoing to transfer the Child and Youth Friendly Spaces (CFS/YFS) from Al-Qaim to the new camp in Al-Obedy. To minimize disruption, three classrooms from the camp school will be used temporarily for the CFS/YFS activities until the final transfer of the CFS/YFS in the new camp is complete. UNICEF in collaboration with UNAMI, provided new playground items to the CFS. The CFSs are catering up to 400 children per day, six days per week in three shifts according to age and gender.

### Northern Iraq

A two-day Child Protection Strategic Planning Workshop organized by UNICEF took place on 16-17 June in Dohuk attended by all the major Child Protection actors. A final plan was drafted and shared with partners for review and comment before final endorsement by the Child Protection Working Group on July 8. The UNICEF Child Protection section in Dohuk has completed a desk review of the child protection issues affecting of Syrian children in Dohuk. The desk review will serve as a basis for future child protection work in the area and will be shared with partners.

CFS/YFS activities continue, with 530 children (275 boys and 255 girls) attending the ACTED CFS and YFS, while 583 children are registered in the CFS run by DOLSA/UNICEF. DOLSA opened a new YFS is offering activities such as sports, music and discussion sessions for 371 (216 boys and 155 girls).

The two Child Protection Units (CPU) are providing critical support for children in the camp. In total, 32 new cases were registered during the reporting period (12 in the ACTED operated CPU and 21 in the DOLSA/UNICEF CPU). UNICEF has been coordinating with Save the Children to roll out child protection training for all CP stakeholders in the camp, including at the CFS/YFS and CPUs. The training will ensure a consistent approach to child protection issues and planned activities.

## Education

### Western Iraq

UNICEF, in cooperation with the Directorate of Education and Implementing Partners (IP) started the summer school in Camp 1 & 2 with variety of activities including painting, calligraphy, embroidery and sewing, chess, football, volleyball, poetry competitions and theater activities. In addition, classes for mathematics, Arabic and English will be arranged for grades 5 - 8. This will alleviate the impact that restricted movement will have on students during the summer period.

### Northern Iraq

UNICEF is supporting the Department of Education to finalize the programme for summer school courses whereby 2,000 students will receive training in fine arts and sport for a period of 45 days. Committees have been formed to manage the activities and purchase the required training supplies. The activities are expected to start early July.

The rehabilitation of Jiyan School continues and involves the enhancement of WASH services targeting the 1,400 students who are currently attending the school for catch-up classes. UNICEF through local contractor, is up keeping this and two other schools, and ensuring health and hygiene systems are functioning properly; in addition to supplying clean water in the schools.

Construction of an additional primary school is underway in Transit 6 in Domiz. No school will be established in Transit 7 due to problems with the availability of land. In Dara Shakran Camp, Erbil, one school is being constructed with the support of UNICEF.

In order to improve monitoring and analysis of student enrollment and performance data, UNICEF with the support of Harikar NGO, is computerizing the pupil information system. This will result in the more rapid identification of students not attending class, dropping out and under-performing.

## Health

### Western Iraq

The Primary Health Care centre in Camp 2 will continue to provide immunization and other primary services until all refugees move to the Al-Obedy camp. During the reporting period 18 children under five received routine vaccinations and 54 women of child-bearing age received their tetanus shots. The decrease in numbers from the last reporting period is due to an increase in the number of refugees returning to Syria. In coordination with Directorate of Health in AL-Qaim, water quality control monitoring program supported by UNICEF will be activated in the new camp starting from 1 July.

## Northern Iraq

Despite the border closure, the Directorate of Health continues to receive 150 - 200 newcomers every day in Domiz Camp, whose children age 0 to 5 receive Measles/Mumps/Rubella (MMR) and Vitamin A supplements. Expanded Programme of Immunization (EPI) services are provided in Domiz camp and reach about 100 children under the age of 5 per week, following the Iraqi EPI calendar including BCG, Diphtheria/Pertussis/Tetanus – Hepatitis B, Haemophilus influenzae type B, Oral Polio Vaccine, MMR and rota virus antigens. UNICEF supports the vaccination teams with food allowances, transportation and cold chain supplies.

As part of its support to the Cholera Preparedness Plan 2013, UNICEF provided 50,000 sachets of Oral Rehydration Salt to the Directorate of Health in Duhok in the reporting period.

## Nutrition

### Western Iraq

As a part of the anemia prevention program, 74 pregnant and 76 breast-feeding women visited the Primary Health Center and received ferrous folic acid and 26 also received Vitamin A supplements. Growth of 94 children under 5 was monitored last month and 14 received vitamin A supplements as a result.

### Northern Iraq

The preliminary results of a UNICEF-funded standard rapid nutrition survey among 900 children under the age of five in Domiz camp have been made available by the Directorate of Health during the reporting period. The survey revealed a Global Acute Malnutrition Rate (GAM) in Domiz Camp of 7.4 per cent with Severe Acute Malnutrition accounting for 2.2 per cent of the total GAM. According to the WHO classification of malnutrition the result indicates a poor/medium nutritional status of the children under five in the camp.

## Inter-Agency Collaboration and Partnerships

A new Health and Hygiene Promotion (HHP) Technical Working Group (TWG) was established by UNICEF in Domiz for the purpose of ensuring a coherent approach to HHP and with the goal of developing a HHP strategy for Domiz camp. The TWG will meet every fortnight.

The WASH working group meeting was held in Domiz on 19 June with 25 participants from Government, UN and the NGO community.

**Health:** \*Al-Qaim only \*\* Domiz only. As refugees have access to free movement in and out to the camp, the figures are not fixed hence the target and % of target is changed based on time.

# Turkey

## Highlights

- Over the reporting period the new container site in Kilis Elbeyli Beşeriye started to admit Syrians. The priority has been given to the most vulnerable families both in the camp for internally displaced persons (Bab-Al Salame) across Kilis border, and to those who are living in urban areas in Kilis province.
- Meetings were conducted with the Ministry of National Education (MoNE) for the teachers' training starting the 24<sup>th</sup> of June 2013. The training is part of the EU-funded project and will involve approximately 1,500 Syrian teachers. They will be trained on child-friendly education and on the International Network for Education in Emergencies (INEE) standards.

## Situation Overview and Humanitarian Needs

On 20 June 2013, the Disaster and Emergency Management Presidency (AFAD) of the Government of Turkey reported that the total number of Syrians registered and accommodated in 20 camps in 10 provinces is 200,039.

It was reported by various sources including local officials that due to ongoing conflict in various locations, the movement of people across the border has intensified. Reportedly at Akcakale border, authorities are admitting approximately 100-150 persons per day, with approximately 3,500 people currently located at the border (Jarablus), the nearby IDP camp and town.

The Elbeyli camp, situated in Kilis province, has begun to receive new arrivals. Camp officials have reported that many new arrivals will come from the IDP camp Bab Al Salame within Syria. In addition a number of vulnerable Syrians living in Kilis urban areas are expected to be admitted to Elbeyli. The camp manager noted that 600 Syrians per day are being admitted to Elbeyli, which is expected to increase to 1,000 new arrivals per day in the near future. During the admission to the camp, Syrians receive a health screening and children are vaccinated before being allocated their container shelter.

## Programme response

**Education** UNICEF will bring together over 1,500 Syrian teachers for a one day training on Child Friendly Education and Inter-Agency Network for Education in Emergencies (INEE) Standards. The training will be staggered during the last week of June and the first week of July in different provinces – Hatay, Sanliurfa and Gaziantep. During this time UNICEF will also begin a profiling exercise to better tailor the training to the needs of the teachers. UNICEF Turkey's International Education Officer arrived on the 21<sup>st</sup> of June and will begin the more detailed training plan for the coming academic year.

**Child Protection and Youth** The identification youth and recreation workers has been completed by the Turkish Red Crescent Society (TRCS). Recreational facilitators and youth workers have been identified, of which approximately half have Arabic language skills (Arabic speakers to be paired with non-Arabic speakers). The initial training of youth and recreation workers will begin on 1 July. Immediately following this training, the youth and recreation workers will be deployed to the camps to begin mobilizing the youth volunteers, and planning and implementing recreational activities for children and youth in the camps. As the Ministry of Family and Social Policy (MoFSP) now has a number of designated staff (including social workers) working with children in the camps, these activities, targeting 10,000 children and youth aged four to 18 years old, will be implemented in coordination with existing structures and activities. The timing of the deployment of the youth and recreation workers coincides with the summer break in school which means there will be increased participation and momentum for youth activities in the field.

## Inter-Agency Collaboration and Partnerships

The Country Representative toured Nizip Camp in Gaziantep governorate with H.E. Dirk Niebel, the German Federal Minister of Economic Cooperation and Development on the 16<sup>th</sup> of June 2013 along with the World Food Programme in Nizip camp. The Minister announced a regional pool of funding for the Syrian crisis of €25 million, of which €5 million will be allocated to UNICEF regionally. The Representative briefed the Minister on the UNICEF emergency program in Turkey, and the visit was accompanied by the Coordinating Governor and Disaster and Emergency Presidency (AFAD) officials. On the 19<sup>th</sup> of June 2013, the Country Representative met with the Dutch Minister of Foreign Affairs, Mr Frans Timmermans, on a visit to Nizip camp organised by the AFAD Gaziantep.

## Supply and Logistics

Recreational kits and tents for 17 camps have been procured for the Child Friendly Spaces. These tents and kits will be in place before the recreation and youth workers are deployed to the camps.

### Comments/Background

**Child Protection:** \*UNICEF has set targets for the planning timeframe of January - December 2013. These are based on anticipated total refugees by December 2013 and therefore do not necessarily reflect needs on the ground at this point in time. Needs on the ground are thus also reported to measure results against actual needs. Achieved at sector level is also reported against actual needs.

**Education:** \*UNICEF has set targets for the planning timeframe of January – December 2013. These are based on anticipated total refugees by December 2013 and therefore do not necessarily reflect needs on the ground at this point in time. Needs on the ground are thus also reported to measure results against actual needs. Achieved at sector level is also reported against actual needs.

\*\*Overall efforts led by the Government of Turkey are ensuring that 29,713 children are in schools/learning programmes inside the camps.
